EDUCATION

Surabaya State University

Bachelor of Science in Informatics Engineering, Faculty of Engineering

Surabaya, Indonesia

Aug. 2024 – Present

EXPERIENCE

Coding Camp powered by DBS Foundation (*Remote*)

Feb 2025 – Jul 2026

Full-Stack Web Developer Cohort

- Graduated with “Full Graduated” honors from a comprehensive independent study program, selected as one of 2,800 participants out of a total of 70,000 applicants from 364 universities across Indonesia.
- Developed and implemented a capstone project titled MindBalance, an AI-based system for predicting stress levels and providing lifestyle recommendations centered on the theme of Healthy Lives and Well-being.

Diginesa (*Remote*)

Apr 2025 – May 2026

UI-UX Designer

Maospati, Magetan

- Leading the UI/UX design team
- Collaborating with cross-functional teams to deliver high-quality software solutions
- Served as a Mentor in a 3-day UI/UX Mini Bootcamp, guiding 30+ participants in understanding the principles of interface design and user experience.

Frontend Developer

- Slicing Figma UI designs into precise Flutter code, ensuring the application’s visuals match the design vision.
- Collaborate intensively with the backend team and other developers to integrate designs into functional systems, ensuring a smooth user flow.
- Applied Clean Architecture principles and efficient state management to maintain a highly scalable, testable, and organized frontend codebase.

PROJECTS

Kost Finder | *Figma, Flutter, Dart, Clean Architecture*

July 2025 – January 2026

- Designed a user-centered mobile interface using Figma, specifically tailored to help students easily find boarding houses (kost) around the UNESA 5 campus in Maospati, Magetan.
- Developing high-quality UI/UX prototypes into functional and responsive websites using Flutter.
- Implemented Clean Architecture principles to separate the domain, data, and presentation layers, ensuring a highly scalable, testable, and maintainable codebase.
- Developed dynamic search and filtering functionalities, enabling users to efficiently browse accommodations based on campus proximity, pricing, and available amenities.
- Optimized application state management and frontend performance to deliver a seamless and engaging user experience for prospective tenants.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, Dart, HTML/CSS, PHP

Frameworks: Vite, Node.js, Flutter, Tailwind CSS, Laravel, Next.js.

Developer Tools: Git, Figma, Vercel, Antigravity, VS Code, Android Studio, Postman.

Libraries: React, Vue.
